

Computer Graphics – Homework 3

Tran Phong Binh

Student ID: 110062421

May 27, 2022

Executable

- The shaders must be in the same folder as the binary's in order to execute the program.

Name	Date modified	Type	Size
 gouraud.fs	27-May-22 14:08	FS File	1 KB
 gouraud.vs	27-May-22 15:20	VS File	3 KB
 OpenGLFramework-VS2017.exe	27-May-22 15:39	Application	424 KB
 shader.fs	27-May-22 14:08	FS File	3 KB
 shader.vs	27-May-22 15:20	VS File	1 KB

Figure: Executable folder

Static Key Controls

- G: nearest/linear magnification
- B: nearest-mipmap-linear/linear-mipmap-linear minification
- \rightarrow : next eye texture
- \leftarrow : previous eye texture

Texture Wrapping

- Since GL_REPEAT is the default behavior for textures in OpenGL, explicitly invoking the respective API for type B models is not needed.

Figure: Type B model

Texture Filtering – Magnification

Figure: Nearest magnification

Texture Filtering – Magnification (Continued)

Figure: Linear magnification

Texture Filtering – Minification

Figure: Nearest-mipmap-linear minification

Texture Filtering – Minification (Continued)

Figure: Linear-mipmap-linear minification

Texture Transform

Figure: Eye texture
